Applied Energy **30** (1988) 317–318

CONTENTS OF VOLUME 30

Number 1

Pyrolysis of Wood Macrocylinders under Pressure: Application of a Simple Mathematical Model 1
R. CAPART, L. FALK & M. GELUS (France)

Finite-Element Analyses of Natural Convections across Horizontal Air-Filled Cavities Each Surrounding a Heated Pipe 15
R. F. BABUS'HAQ & S. D. PROBERT (UK)

Heat-Exchanger Design: Optimal *Length* of an Array of Uniformly-Spaced Vertical Rectangular Fins Protruding Upwards from a Horizontal Base . . 29
C. W. LEUNG (Hong Kong) & S. D. PROBERT (UK)

A New Ejector–Absorber Cycle to Improve the COP of an Absorption Refrigeration System 37
LI-TING CHEN (Taiwan)

Reducing the Thermal Resistance of a Pressed Contact 53
P. W. O'CALLAGHAN & S. D. PROBERT (UK)

Simulation Studies of the Behaviour of a Heat Pipe-Assisted Solar Absorption Refrigerator 61
R. R. AL-HINDI, A. M. A. KHALIFA & M. AKYURT (Saudi Arabia)

Number 2

Editorial 81

Wood Liquefaction—an Overview 85
J. M. BOUVIER, M. GELUS & S. MAUGENDRE (France)

Stratified Thermal Storage Tank Inlet Mixing Characterization 99
Y. H. ZURIGAT, A. J. GHAJAR & P. M. MORETTI (USA)

Energy Conservation and Resource Utilisation in Waste-Water Treatment Plants 113
S. A. TASSOU (UK)

Steady Heat Transfers through a Phase-Changing Fluid in a Solar Collector Circuit 131
J. PRAKASH & M. BERTELÀ (Italy)

Applied Energy **30** (1988)—© 1988 Elsevier Applied Science Publishers Ltd, England. Printed in Great Britain

A Modular Approach to the Simulation of Steam-Turbine Cycles 147
B. PALÁNCZ (Hungary)

Optimising the Choice of Energy-Thrift Measures for Hospitals 153
A. E. ADDERLEY, P. W. O'CALLAGHAN & S. D. PROBERT (UK)

Number 3

Mathematical Modelling of a Fluidised-Bed Charcoal Gasifier 161
ANGSHU SETT & S. C. BHATTACHARYA (Thailand)

Recommended Location of a Hot Horizontal Pipe in a Relatively Cool Rectangular Trench Filled with Thermal-Insulating Spheres 187
R. F. BABUS'HAQ, S. D. PROBERT & L. M. DALY (UK)

Energy and Economic Comparisons of a Heat Pump/Heat Store with Conventional Heating Systems in the British Climate 197
P. P. VOTSIS, C. J. MARQUAND, S. A. TASSOU & D. R. WILSON (UK)

Model of a Spectrally Selective Decoupled Photovoltaic/Thermal Concentrating System 209
M. A. HAMDY (Egypt), F. LUTTMANN & D. OSBORN (USA)

Energy Profile of a Seed-Processing Plant 227
MAHARAJ NARAIN & B. P. N. SINGH (India)

Energy Norms and their Measurement in Agriculture 235
A. R. RAO (India)

Number 4

Design and Simulation of a Solar-Powered/Fuel-Assisted Rankine Engine for Power Generation 245
H. GARI, A. KHALIFA & A. RADHWAN (Saudi Arabia)

Energy-Use Patterns under Various Farming Systems in Punjab. 261
SURENDRA SINGH, J. P. MITTAL, M. P. SINGH & R. BAKHSHI (India)

Energy-Saving Options. 269
A. E. ADDERLEY, P. W. O'CALLAGHAN & S. D. PROBERT (UK)

Simulation of Ambient-Air Drying of Rapeseed: I. Development of Drying Process Model and Feasibility Study 281
B. G. PATIL & G. T. WARD (New Zealand)

Optimum Pond Temperature for Maximizing Power Production of a Non-convecting Solar-Pond Heat-Conversion System 305
KOUICHI KAMIUTO (Japan)
